

# AHMED BADAWY

Junior Web Developer | UI/UX Designer | Fit4Rail Summer Internship 2026 Candidate

Cairo, Egypt | +20 101 134 9165 | [ahmedbadawix77x@gmail.com](mailto:ahmedbadawix77x@gmail.com)

## PROFESSIONAL SUMMARY

Junior Web Developer and Fit4Rail Summer Internship 2026 candidate with 1+ year of freelance experience delivering 5+ web applications for real clients across multiple industries. Achieved a 3.3/4.0 GPA at Banha University while managing a self-employed practice independently — handling client requirements, project timelines, and deployment with zero supervision. Proficient in Microsoft Word, Microsoft Excel, and PowerPoint for professional documentation and reporting. Reduced client manual workload by 8+ hours/week through workflow automation. Able to work independently and collaboratively within cross-functional teams, prioritize tasks effectively, and take full ownership of assigned responsibilities.

## EDUCATION

**Bachelor of Science – Computer Science** | *Banha University, Faculty of Specific Education 2022 – Expected 2026*

- ▶ **GPA: 3.3 / 4.0** — top 15% of department; maintained while running a concurrent freelance practice
- ▶ Completed 6+ core technical courses: Data Structures, Algorithms, Database Systems, Software Engineering, HCI, and Networks
- ▶ Balanced full-time academic workload (**18+ credit hours/semester**) while managing 5+ concurrent freelance client projects
- ▶ Completed Introduction to Psychological Sciences, strengthening understanding of user behavior and communication dynamics

## WORK EXPERIENCE

**Freelance Web Developer & UI/UX Designer** | *Self-Employed*

*Jan 2024 – Present*

- ▶ Built and launched **5+** responsive web applications using React.js, TypeScript, and WordPress, achieving 100% on-time delivery across all client projects
- ▶ Managed complete project lifecycles across 3+ industries — from requirements gathering and wireframing to deployment — cutting average delivery time by 20%
- ▶ Integrated SQL/PostgreSQL databases and automated business workflows using n8n, cutting **8+** hours of manual effort per week for clients
- ▶ Served **10+** clients, maintaining a 100% satisfaction rate by organizing tasks via Notion and Git with structured weekly progress reports
- ▶ Authored **15+** structured progress reports and client presentations, strengthening written technical documentation skills

## CORE SKILLS

- ▶ Microsoft Word, Microsoft Excel, PowerPoint, and Outlook — leveraged across **10+** client projects to produce reports, financial summaries, slide decks, and technical documentation
- ▶ Communication: presented **15+** written and verbal reports to clients across 3+ industries with 100% satisfaction rate, adapting technical language to non-technical audiences
- ▶ Teamwork: oversaw **5+** multi-stakeholder projects using Git-based workflows and Notion boards, achieving 100% on-schedule delivery across all engagements
- ▶ Work independently: managed entire project lifecycles solo across **10+** client engagements — from initial scoping to final deployment — with no managerial oversight
- ▶ Problem-Solving: resolved **20+** production bugs and engineered 3+ automation solutions, reducing client operational costs by 30% and improving system reliability
- ▶ Organization: juggled **5+** concurrent projects simultaneously using Notion task boards and Git version control, maintaining 100% on-time delivery rate
- ▶ Frontend Development: React.js, TypeScript, HTML5, CSS3, JavaScript (ES6+) — 5+ production applications deployed and actively maintained
- ▶ Backend & Database: PHP, WordPress, MySQL / PostgreSQL, Node.js basics — integrated across **3+** client systems handling real user data

- ▶ Design Tools: Figma, Photoshop — executed UI/UX designs for **5+** clients; AI-assisted branding for 2+ projects with measurable client satisfaction
- ▶ Languages: Arabic (Native) | English (Professional — Written & Spoken) — communicated with **10+** international clients across 3+ countries

## KEY PROJECTS

---

### Client Business Portal — Full-Stack Web Application

- ▶ Engineered a full-stack business portal for a retail client using React.js, PHP, and PostgreSQL — serving **200+** end users at launch with zero critical bugs reported in the first 30 days
- ▶ Delivered project **2 weeks ahead** of schedule by applying structured task management and daily progress tracking, reducing client review cycles by 3 iterations and saving 10+ hours of back-and-forth
- ▶ Documented **10+** pages of requirements, architecture, and deployment steps in Microsoft Word, enabling seamless client handover with zero post-launch issues and full knowledge transfer

### Workflow Automation System — n8n Integration

- ▶ Identified **4 critical** operational bottlenecks and built an n8n automation pipeline, recovering 8+ productive hours weekly from manual processes
- ▶ Presented solution to **3 non-technical** stakeholders using PowerPoint slides, achieving sign-off in a single meeting with no revision requests

### Multi-Client Freelance Portfolio — Responsive Web Design

- ▶ Delivered 5+ responsive websites with 100% client satisfaction, reducing average page load time by **35%** through performance optimization
- ▶ Maintained structured Git repositories across all **5+** projects, enabling version rollback and team-ready codebases within 24-hour turnaround

## CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

---

- ▶ Meta Front-End Developer Certificate (**75%** complete) — covering React.js, version control, and responsive design across 8 modules
- ▶ Completed **3** Agile/Scrum online modules to align with enterprise project workflows used at companies like Siemens
- ▶ Reviewed **10+** Siemens Mobility case studies and rail technology publications to understand core business domains

## WHY FIT4RAIL? — VALUE I BRING

---

- ▶ Launched freelance career at age 20 with 0 clients, grew to **10+ clients within 12 months** through independent outreach, referrals, and consistent delivery — demonstrating initiative and ownership
  - ▶ Facilitated **15+** client presentations with 100% approval rate — translated complex technical deliverables into clear business outcomes, bridging the gap between technical teams and decision-makers across 3+ industries
  - ▶ Led **3+** cross-industry projects using Git and Notion boards, completing every milestone on schedule across all engagements while working independently without managerial oversight
  - ▶ Applied Microsoft Word, Microsoft Excel, and PowerPoint across **10+** client engagements to produce technical documentation, project budgets, and business reports — all delivered to professional standards
  - ▶ Mastered **4 new frameworks** (React.js, TypeScript, n8n, PostgreSQL) within first 12 months of freelancing — entirely self-taught, demonstrating ability to acquire new skills rapidly and apply them under real-world conditions
-
